Physical Map of SA:

Draw a red line between the two points on the map that are used for the cross-section below.

(1)

Cross-section profile of SA

Use the terms from the table to label this cross-section. Remember to label ALL features that you can see. (7)

Cross-section profile of South Africa (MEMO)

A. Explain what a cross-section profile is and what it shows?

It is a side view of a landscape between at least two points. It's drawn in the form of a graph and shows elevation or height above sea level.

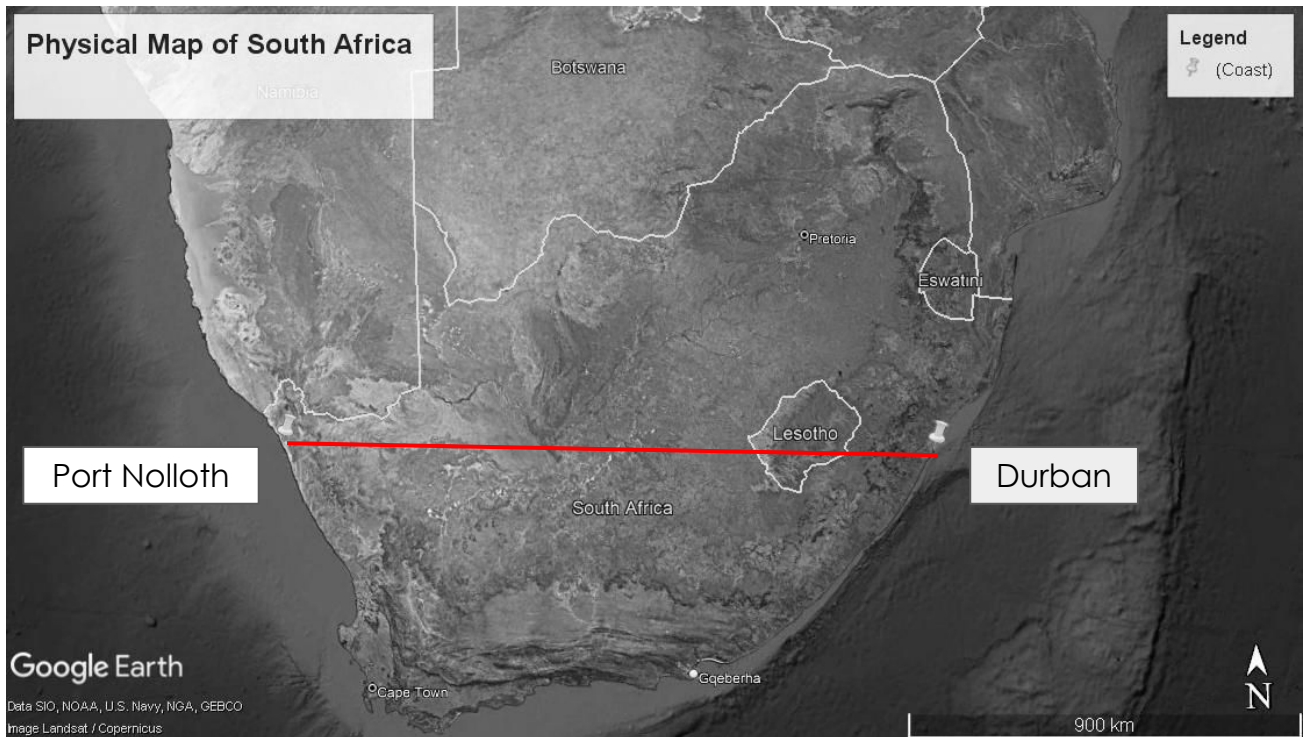

B. Complete the table by writing your own definition of the following terms (words):

TERM	DEFINITION
Coastline	Where the land and the sea or ocean meet.
Coastal plain	A strip of fairly level land next to the ocean.
Escarpment	An area of land with a steep slope. It usually separates two sections of fairly level land with different elevations.
Plateau	This is a flat or fairly level, elevated area.

Physical Map of SA:

Draw a red line between the two points on the map that are used for the cross-section below.
